

# SOLEIL NOIR

Design Odile Decq, 2015

**LUCE  
PLAN**

Type:	Suspension		
Light Source:	LED 35W ~3000K 1728 lm <sup>(1)</sup>	EEL: A	push dimmer/DALI
Product use:	Indoor		
Materials:	molded polyurethane foam		
Colors:	white, black		
Description:	Technological and futuristic, Soleil Noir by Odile Decq is a suspension and ceiling lamp with an organic form in molded polyurethane foam, whose LED light source is hidden inside a disk that generates homogeneous diffused, indirect lighting. Supported by a single asymmetrical cable, it keeps its balance thanks to the thicknesses of the body, functioning as a slim, aerial lighting element that conveys brightness with discretion and elegance. It is equipped with an avantgarde optical system to guarantee uniform light flow on the diffuser.		

Insulation class: 

Reference code:	Structure
